What is a Stormwater Conservation Garden?

View of the future Stormwater Conservation Garden looking towards the school
Drawing by Debb Smith of 9bark DESIGN

A stormwater garden filters pollutants from runoff, while a water conservation garden consists of native plants that require little or no irrigation water or fertilizer. This garden does both! Water conservation gardens are promoted in regions without easily accessible, plentiful, or reliable fresh water supplies. A plan sketch of the stormwater conservation garden is illustrated to the left.

WILDWOOD NURSERY
Big Sky, Montana

FTD

If the special women in your life live someplace else, show them how much they mean to you with a special bouquet delivered to her for Mother's Day by FTD!

Wildwood Nursery has generously donated their time for the construction of the edible herbs arrangement, which your mother is sure to love!

Please detach the lower portion and mail to: blue water Task Force Gallatin Watershed PO Box 160513 • Big Sky, MT 59716
